# INCIDENT RESPONSE

## Swiftly react and recover from cyber events

A computer emergency response team (CERT) is a group of experts who responds to cybersecurity incidents. CyberSOC Africa's experts have unmatched response time in providing the region with superior, on-premise defense that significantly reduces risk exposure while empowering business leaders to focus on growing their business with confidence.  Our teams deal with the evolution of malware, viruses and other cyberattacks.

✓ Unmatched in-continent/Country
SLA, 24/7 on call team

✓ Military grade tactics
and experienced personnel

✓ In depth Technological
understanding and agility

✓ Offshore A grade back up team
on standby included in the SLA

✓ In-house Forensic support team with
cutting edge technological capabilities

✓ Ongoing monitoring and analytics
of your Network using high end
EDR and network analytics tools

Preparation and readiness is key to respond swiftly and accurately. IR plan/program and exercising it are critical for a successful IR process.
