

SOC AS A SERVICE

Monitoring, Alerting & Reporting

Our team employs the latest and most advanced technologies and cyber tactics to provide unmatched minimal response time and effectiveness. Our security experts can help accelerate investigations, minimize cyber as well as business risks and improve your Cyber Security posture.

CyberSOC Africa, the continent's cyber security leader, protects and defends enterprises, SMEs and governments' most significant digital business assets and data. Based on military-grade cyber expertise and methodologies, it is one of the most sophisticated local cyber intelligence networks available in Africa.

Our red team experts provide corporates from all industries with realistic cyber-attacks against infrastructures, processes, and technologies. The Red Team conducts controlled cyber-attacks against your corporate network in order to test your entire security ecosystem for operational readiness and uncover potential risks and security gaps.

SOC AS A SERVICE

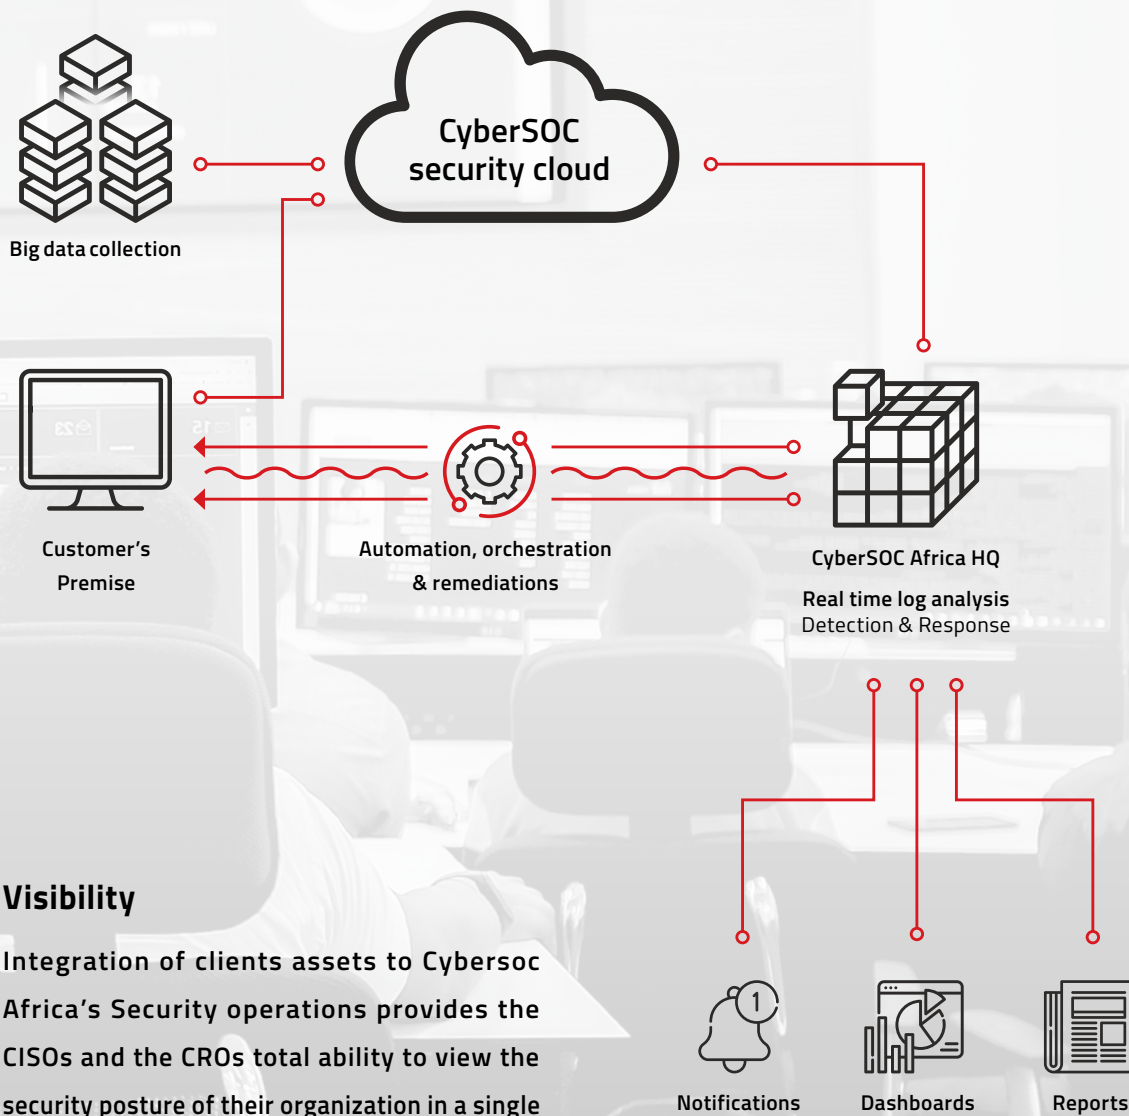

Cyber security of international caliber: local and at scale

CyberSOC Africa operates an in-country, state-of-the-art, ISO certified security operations center. It is comprised of uncompromising design, quality, rigorous engineering, and best-in-breed technologies coupled with an elite team of cyber experts to deliver total cyber enforcement and superior technological capability. Our analysts are exposed to a wide array of cyber incidents, customers, technologies, verticals and disciplines, which gives them the ability to provide you with unmatched value in terms of cyber expertise, and ultimately cyber resilience.

- ✓ 24/7/365 ISO certified Security Operations Center
- ✓ Integration to customer existing technology stack and cloud infrastructure
- ✓ Automation and Orchestration
- ✓ Dedicated local team of experts and military grade experts
- ✓ Real time analysis
- ✓ Unmatched reporting
- ✓ AI-based vulnerability assessment and Penetration Testing
- ✓ Advanced Threat Intelligence, targeting Africa's unique cyber threatscape
- ✓ On-premise support & maintenance
- ✓ Vulnerability scans and assessments
- ✓ RED team & Pentesting
- ✓ Cyber security assessment

SOC AS A SERVICE

360° Cybersecurity: Visibility,
Security, Assurance and Report.

Visibility

Integration of clients assets to Cybersoc Africa's Security operations provides the CISOs and the CROs total ability to view the security posture of their organization in a single pane of glass. Cybersoc Africa's technology and expertise provide you ongoing visibility into your digital systems, assets and data at a glance for thorough protection. Easy to use and operate, the UI includes Google-like search functionality to quickly find events and understand activities.

SOC AS A SERVICE

Security

CyberSOC Africa's experts have unmatched response time in providing the region with superior, on-premise defense that significantly reduces risk exposure while empowering business leaders to focus on growing their business with confidence.

Assurance

CyberSOC Africa's report team produces dynamic comprehensive reports that provide CISOs and their teams unmatched visibility into their organization's security maturity. These weekly, monthly and quarterly reports consist of 3 dashboards that incorporate information from hundreds of attributes in order to illustrate organizational security maturity score, industry benchmark (how do you rank among your industry) and global benchmark. The reports contain a dynamic simulator that allows IT leaders to gain actionable insights to improve their scores - essentially it is a sophisticated planning tool for maximizing cyber resilience.

Users connect to CyberSOC's web-based UI to perform daily activities. CISOs can use the UI to gain total visibility of their cyber security posture from a single pane of glass. CROs can define and refine their risk assessments based on cyber resilience scores and actionable insights to improve posture and reduce risk exposure. IT security and operations users can use the UI for ongoing assessments as needed. The single pane of glass dashboard design allows ongoing visibility into your digital systems, assets and data at a glance for thorough protection.
