

BUILD YOUR OWN SOC

Build, Operate, Transfer (BOT)

Harness international expertise and build your Security Operations Center in Africa

Technology, Innovation, Design and Ergonomics - these are the main pillars upon which CyberSOC executes SOC building projects. High-resolution dynamic video walls, ultra-modern conference and boardroom designs, as well as technically highly optimized operator areas - tailored to your needs.

TOP TARGETED COUNTRIES
Highest rate of attacks per organization in the last day.

- Mongolia
- Indonesia
- Bolivia
- Vietnam
- Kazakhstan

TOP TARGETED INDUSTRIES
Highest rate of attacks per organization in the last day.

Jibritio itoi

TOP MALWARE TYPES
Malware types with the highest global impact in the last day.

- Spyware
- Botnet
- Backdoor

- Malware
- Phishing
- Exploit

BUILD YOUR OWN SOC

By detailed studies of the specific customer environment, CyberSOC fully adapts the needs of the clients for achieving excellent results in interior designs, display systems and ambient lighting setups for 24/7 operation sites.

CyberSOC Africa has extensive experience in designing, building and operating SOC's. We bring international expertise and Israeli military-grade experience in order to build your own SOC in Africa up to the highest market standards.

CyberSOC Africa's rigorous design process includes everything you need to successfully build and operate your own SOC in Africa. We guide our customers through a smooth transition starting with managed security services whilst providing comprehensive training portfolios, until the customer is prepared to operate his fully staffed SOC.

Having built dozens of advanced SOC's in Israel across all industries - from law enforcement entities, through banks and telecommunication enterprises, to oil & gas giants, we offer a full turn-key building, operating and transferring service that allows for a smooth transition to ensure that your business can confidently stay focused on its core competency.
